EDUCATION

Bachelor of Science in Computer Science

University of California, Riverside

GPA: 3.95/4.00

September 2024 - June 2028

WORK EXPERIENCE

Undergraduate Learning Assistant / Tutor

University of California, Riverside

October 2025 – Present

Riverside, California

- Provided 12+ hours/week of student support, improving retention and performance for classes of 100+ students.
- Directed 100+ personalized 1:1 tutoring sessions focusing on Software Development Life Cycle concepts, including Agile, Test Driven Development, Object Oriented Programming, and Continuous Integration/Continuous Development pipelines.
- Evaluated code and provided actionable debugging feedback for 50+ assignments, improving students' overall code quality.

Software Engineering Intern (Grid Automation Services)

Southern California Edison (SCE)

June 2026 – September 2026

Rosemead, California

- Worked on an internal microservice that schedules and assigns projects to crews, replacing 100+ manually managed documents with a single source of truth, delivering features using React/TypeScript and Python.
- Integrated Oracle, SAP, and Salesforce data into backend and implemented caching, cutting repeat load times by 80-90%.
- Reduced Salesforce-to-Oracle Airflow DAG runtime by 50% by parallelizing API requests and implementing server-side filtering, accelerating data availability while preserving output parity with the existing pipeline.
- Added 12 tools to Plane MCP server (self-hosted Jira alternative) with input validation and safe error handling, enabling AI agents to manage tickets via natural language, and cutting tool payload/token usage by around 90%.
- Delivered and authored 30+ user stories in an agile environment, refining requirements through daily standups and stakeholder feedback.

Web Developer / VP of Internal Affairs

Association for Computing Machinery @ UCR (ACM @ UCR)

December 2024 – May 2026

Riverside, California

- Engineered scalable web applications for student organizations using React.js, Next.js, and Tailwind CSS, expanding platform access to 2,000+ active students.
- Collaborated within a 10+ person engineering team utilizing Agile/Scrum methodologies; drove 20+ bi-weekly sprint planning and stand-ups to accelerate feature delivery.
- Orchestrated internal operations and event logistics for 500+ members, successfully executing 10+ events.

PROJECT EXPERIENCE

UCR Timesheet Automation | Chrome Extension, React, TypeScript, Upstash Redis

June 2026 – Present

- Reduced biweekly timesheet submission from over a minute of manual entry to a single click by building a Chrome Extension (MV3) paired with a React/TypeScript web app, now used by 20+ tutors and readers at UCR.
- Bypassed IP-based session validation that blocked server-side automation by architecting a two-world content script bridge with `chrome.scripting.executeScript` to route Oracle APEX API calls through the user's own browser tab.
- Enabled dynamic tracking for 2+ concurrent job positions within the same pay period by implementing per-job schedule persistence in Upstash Redis with automatic cache invalidation after each save.

Digital Photo Booth | Django, Django REST Framework, PostgreSQL

April 2026 – June 2026

- Built 19 REST endpoints across 3 Django apps and 8 relational models, implementing dual JWT auth (email and Google OAuth 2.0) with automatic username collision resolution.
- Engineered a friend-prioritized feed using Django query annotations and bidirectional friendship lookups, ranking friends' cards above others.

Reel to Real | React, TypeScript, Tailwind, FastAPI, Python

January 2026

- Secured 2nd Place in Twelve Labs Track overall among 300+ competitors at SB Hacks XII by architecting an AI-powered travel agent to streamline trip planning.
- Formulated a Modified Traveling Salesman Problem (TSP) algorithm with time-window constraints to generate efficient multi-stop itineraries for up to 15 locations, reducing backtracking by 30%, and exposed it via a FastAPI backend.

TECHNICAL SKILLS

Languages: C/C++/C#, Python, Java, TypeScript/JavaScript, HTML/CSS

Frameworks: React, React Native, Next.js, Node.js, Expo, TailwindCSS/NativeWindCSS

Databases & Cloud: SQL, NoSQL, PostgreSQL, AWS, Redis

Developer Tools: Git, GitHub, GitHub Actions (CI/CD), GoogleTest, Docker/Containers, Linux
